Call to discuss methane LEL exceedance at GP-02 and the potential for the BUSTR removal action to be a source of methane.

At 1:00 ET, please call: (614) 387-7405. This is a bridgeline, there is no passcode, the line will ring until someone else calls in at the same time.

If anyone has any agenda items they'd like to discuss, please update the group.

Here are some that I came up with:

- Background on situation at South Dayton Dump and Landfill and GP-02
- History and current status of BUSTR closure at DP&L including the bio-sparg system
- Potential sources of methane at DP&L property, potential for landfill gas to have migrated
- Regulatory authority
- Next steps
